Subject: RE: Tomorrow's meeting

Hi Ben,

It is a very fair question, technical questions will not be on the agenda as most would cover CBI material.

Probably, my main general question would be GCS's logic or expectations from submitting the application to the GSDT in a piecemeal fashion? Along with a couple related questions or comments to smooth the process where possible.

We are still working on cross-walks for each module, which is bringing up more questions for us internally. After some of those are smoothed out, there will be a new round of our three draft documents.

If the layer package for the revised AoR could be added to your CBI area, that would be helpful, too.

Thanks for checking,
Nancy

Subject: Tomorrow's meeting

Nancy,

Just a quick note to check in if there is either an agenda or perhaps a list of topics/questions you'd like to cover during our call tomorrow. We certainly want to be responsive to any questions and comments from EPA. I certainly do not mean to insinuate that we should have an agenda or that you have questions – I just want to ensure we are being proactive at GCS in addressing any questions you and the team at EPA may have. We are looking forward to the meeting tomorrow. Many thanks and all the best.
